search for information pertinent to the lease sales, including consideration of the Deepwater Horizon event, surveys of scientific journals and credible scientific data and information from academic institutions and Federal, State, and local agencies, and interviews with personnel from academic institutions and Federal, State, and local agencies. The BOEM has examined potential impacts of routine activities and accidental events, including a possible low probability, catastrophic event associated with the proposed lease sales, as well as the proposed lease sales’ incremental contribution to the cumulative impacts on environmental and socioeconomic resources. The oil and gas resource estimates and scenario information for this draft Multisale EIS are presented as a range that would encompass the resources and activities estimated for the WPA and CPA proposed lease sales.

Several libraries along the Gulf Coast have been sent copies of the Draft EIS. To find out which libraries have copies of the Draft EIS for review, and their locations, you may contact BOEM’s Public Information Office.
