

LTEMP FEIS Errata List

The following errors were found in the LTEMP Final Environmental Impact Statement after it had been published. None of these errors affect the decision to identify Alternative D as the selected alternative. These errors are identified here to alleviate any potential confusion for readers of the FEIS.

Page ES-1, last paragraph, line 5: Change “14 Cooperating Agencies” to “15 Cooperating Agencies.”

Page ES-48, Table ES-3, Natural Processes, Alternative E: Change “there would be lower nearshore habitat stability as a result of *lower* within-day fluctuations” to “there would be lower nearshore habitat stability as a result of *higher* within-day fluctuations.”

Page 2-46, paragraph 2, line 6: Change “Bishop et al. (1995)” to “Bishop et al. (1987).”

Page 2-67, paragraph 5, last line: Change “Ralston *et al.* 2012” to “Ralston 2011.”

Page 2-94, Table 2-14, Natural Processes, Alternative E: Change “there would be lower nearshore habitat stability as a result of *lower* within-day fluctuations” to “there would be lower nearshore habitat stability as a result of *higher* within-day fluctuations.”

Page 3-112, paragraph 2: Delete redundant sentence “Vegetation in the Fluctuating and New High Water Zones are greatly influenced by river flow and dam operations but above daily fluctuation levels (Carothers and Brown 1991).”

Page 4-57, last paragraph: Change “In summary, compared to Alternative A, Alternative D would result in negligible changes from current conditions related to reservoir elevations, no change in annual operating tiers, more even monthly release volumes and mean daily flows, and *lower* mean daily changes in flow” to “In summary, compared to Alternative A, Alternative D would result in negligible changes from current conditions related to reservoir elevations, no change in annual operating tiers, more even monthly release volumes and mean daily flows, and *comparable* mean daily changes in flow.”

Page 4-92, Table 4.4-2, Natural Processes, Alternative E: Change “there would be lower nearshore habitat stability as a result of *lower* within-day fluctuations” to “there would be lower nearshore habitat stability as a result of *higher* within-day fluctuations.”

Page 4-111, Table 4.5-1, Alternative D: Change “slight potential *decrease* in spawning habitat availability and stability due to *slightly greater* within-day flow fluctuations during the spawning period” to “slight potential *increase* in spawning habitat availability and stability due to *more even monthly release volumes and similar* within-day flow fluctuations during the spawning period.”

Page 4-149, paragraph 3: Change “Compared to Alternative A, habitat quality and stability for nonnative fish is expected to be slightly higher because of *slightly lower within-day flow*

fluctuations, especially during the winter” to “Compared to Alternative A, habitat quality and stability for nonnative fish is expected to be slightly higher because of *more even monthly release volumes and similar* within-day flow fluctuations.”

Page 4-151, paragraph 1: Change “The quantity, quality, and stability of nearshore habitats would be *affected less* under Alternative D than under Alternative A because *within-day flow fluctuations would be slightly less under this alternative than under Alternative A, especially during winter*” to “The quantity, quality, and stability of nearshore habitats would be *slightly higher* under Alternative D than under Alternative A because of *more even monthly release volumes and similar* within-day flow fluctuations.”

Page 4-219, Table 4.7-2, Alternative D: Change “increase in habitat stability and insect production in nearshore habitats from *reduced* daily fluctuations and relatively even monthly release volume” to “increase in habitat stability and insect production in nearshore habitats from *similar* daily fluctuations and relatively even monthly release volume.”

Page Q-6, Table Q-1: Change “Alternatives *Adequate* Will Not Protect Colorado River Ecosystem” to “Alternatives Will Not Protect Colorado River Ecosystem.”

Page Q-12: Delete the following text “The following outline presents the comment categories, a brief description of the issues raised, and the location in the following section where each issue is summarized and DOI’s response is presented.”

Page Q-15, last paragraph: Delete “[519951]” from the last sentence “The preferred alternative showed a better balance among resources to achieve the purpose and need. [519951]”

Page Q-18, first paragraph of response: Delete “[519929]” from the last sentence “The Biological Assessment is found in Appendix O in the final EIS. [519929]”

:
